

Jabari Robinson

Swansboro, NC 28584 | 910.545.3650 | jbrobinson15@icloud.com | www.linkedin.com/in/robinson-jabari/

Education

University of North Carolina at Pembroke, Pembroke, NC

Bachelor of Science in Computer Science

Graduated May 2026

University of North Carolina at Pembroke AI Club | Member

August 2025 – Present

- Participated in discussions and workshops involving artificial intelligence, machine learning, and emerging technologies

University of North Carolina at Pembroke Trading Club | Member

January 2026 – Present

- Collaborated in managing and analyzing a real \$15,000 student investment portfolio by researching equities, evaluating market trends, and presenting data-driven investment recommendations.

Experience

Walmart Associate | Online Pickup & Delivery

May 2023 – August 2025

- Managed 180+ customer orders daily using alphanumeric sorting systems to ensure fast and accurate retrieval
- Utilized handheld inventory and fulfillment technology to process, track, and verify online orders efficiently
- Collaborated with team members in a fast-paced operational environment to meet daily performance and customer service goals

Projects

UNCP Navigation System — Full-Stack Web App

August 2025 – December 2025

- Developed a full-stack campus navigation application supporting 7,000+ UNCP students and faculty using Node.js, Express.js, and TypeScript.
- Designed and implemented a PostgreSQL database with 11 normalized tables, JSONB geospatial storage, and optimized GIN indexes for location-based queries.
- Implemented JWT authentication, CORS security, and environment configuration to improve application scalability and secure API access.

EndlessEscape — 3D Endless Runner Game (Unity 6, C#)

January 2026 – May 2026

- Developed a 3D endless runner game in Unity 6 featuring progressively increasing gameplay difficulty and a cyber/matrix-inspired visual style.
- Implemented gameplay systems including obstacle spawning, collision detection, coin collection, and exponential speed scaling using C# scripting.
- Integrated Unity Input System, TextMeshPro, and URP post-processing effects including bloom, chromatic aberration, and glitch effects.
- Built persistent high-score storage and randomized obstacle generation systems to improve replayability and player engagement.

Personal Portfolio Website

April 2025

- Designed and developed a responsive portfolio website to showcase technical projects, skills, and professional experience.
- Built reusable UI components and implemented seamless navigation using Next.js and Tailwind CSS.
- Deployed the application through Vercel with continuous integration workflows and performance optimization.

Technical Skills

Languages: JavaScript, TypeScript, Python, Java, C#, HTML/CSS

Frameworks & Libraries: React, Next.js, Node.js, Express.js, Tailwind CSS

Developer Tools: Git/GitHub, PostgreSQL, Docker, REST APIs, Vite, npm, pgAdmin, VS Code, XAMPP, Unity 6

Concepts: Full-Stack Development, API Design, Backend Architecture, JWT Authentication, UI/UX Design, Agile/Scrum

Certifications & Awards

IBM Full-Stack JavaScript Developer (In Progress)
Coursera / IBM

Funding Traders — \$10K Funded Account Challenge (Passed) *Issued March 2025*

- Demonstrated disciplined risk management, market analysis, and consistent profitability under live-market trading conditions while adhering to strict drawdown limits.

Career Essentials in Generative AI by Microsoft and LinkedIn *Issued March 2025*

- Covered topics including Generative AI, Prompt Engineering, Responsible AI, Microsoft Copilot, and Artificial Intelligence for Business.

Responsive Web Design Certification: freeCodeCamp.com *Issued January 2024*

- Completed 300+ hours of HTML and CSS training while building responsive web projects focused on modern web design principles.
