PROFESSIONAL SUMMARY

Computer Science graduate and full-stack developer with hands-on experience building and deploying web applications using React, TypeScript, Node.js, Express.js, and PostgreSQL. Trained in data engineering with Apache Spark and PySpark. Experienced with RESTful API design, relational database modeling, and agile development workflows.

EDUCATION

University of North Carolina at Pembroke
Bachelor of Science in Computer Science.

Pembroke, NC
May 2026

EXPERIENCE

Software Engineering Training Program
Revature

June 2026 – August 2026

- Completed an intensive 10-week software engineering program covering Python, SQL, object-oriented programming, SDLC, Agile, Git, and relational database development; earned a 91.23% on the Exit Assessment.
- Built data engineering solutions using Apache Spark, PySpark, Spark SQL, Hadoop, HDFS, and Hive, applying DataFrame transformations, aggregations, partitioning, caching, and distributed data processing.
- Wrote Python and SQL solutions covering database connectivity, joins, transactions, data modeling, file I/O, JSON processing, and exception handling through project-based assignments.

PROJECTS

Campus Compass

June 2026 – Present

Full-Stack Campus Navigation Platform

- Building a full-stack campus navigation platform using React, TypeScript, Express.js, Prisma ORM, and PostgreSQL, designed to serve UNCP's 7,000+ student population in locating campus buildings, services, and resources.
- Designing and implementing RESTful APIs, authentication workflows, relational database schemas, and scalable backend services alongside responsive React user interfaces.
- Implementing role-based access control (RBAC), modular application architecture, and feature-based Git workflows to improve maintainability and support future scalability.

EndlessEscape

January 2026 – May 2026

3D Endless Runner Game | Unity 6, C#

- Developed a 3D endless runner game in Unity 6 featuring progressively increasing gameplay difficulty and a cyber/matrix-inspired visual style.
- Implemented obstacle spawning, collision detection, coin collection, randomized obstacle generation, and exponential speed scaling using C# scripting.

Personal Portfolio Website

April 2025 – Present

HTML5, CSS3, GitHub Pages

- Designed, developed, and deployed a responsive portfolio website showcasing software projects, certifications, and technical skills using HTML5, CSS3, and GitHub Pages.

SKILLS

Languages: JavaScript, TypeScript, Python, Java, C#, SQL

Frontend: React, Next.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, Prisma ORM, REST APIs

Databases: PostgreSQL

Data Engineering: Apache Spark, PySpark, Spark SQL, Hadoop, HDFS, Hive

Developer Tools: Git, GitHub, Docker, Vite, npm, VS Code, pgAdmin, Unity 6

CERTIFICATIONS

- IBM Introduction to Software Engineering (June 2026)
- IBM Introduction to HTML, CSS, & JavaScript (June 2026)
- Responsive Web Design Certification (January 2024)
